**Holicong Wellness Committee:** This month the wellness committee wanted you to focus on being happy and healthy. You can do that in many different ways. You can have a laugh, try some deep breathing techniques, listen to music, or do things that you enjoy. Sometimes just taking a minute to take a brain vacation is enough to relieve stress. What's a brain vacation? It's like a daydream...taking time to think about your happy memories, fun goals and just thinking about things that you enjoy. So, this morning we want you to take a one minute brain vacation and think about something...If you had all the money in the world and didn't have to go to school.... what would you do?
