

Dear Central Bucks Families,

Central Bucks School District has partnered with Microsoft to offer Microsoft Office 365 to students in Grades 5-12. Office 365's productivity suite enables students and teachers to share documents, access Microsoft software applications online and work collaboratively. As the district increases both teacher and student access to educational technology, we wanted to remind you of a great opportunity.

Microsoft Office is available free for students in grades 5-12. Students may want to take the opportunity to install the full Office applications on up to 5 PCs, Macs or tablets for free. This includes Word, Excel, PowerPoint and OneNote. Students can learn more about the process here: <http://www.cbsd.org/365>

Once downloaded, students can work with classmates online and see each other's changes in real time with Office Online, the full version of Office or OneDrive.
